

Message from Director (HR) on **WORLD ENVIRONMENT DAY**

Dear Colleagues,

"We do not inherit the Earth from our ancestors, we borrow it from our children."

– David Brower

This powerful quote is a timely reminder that the choices we make today will shape the legacy we leave behind. Caring for our planet is not just an environmental concern — it is a moral responsibility, a collective human duty, and a promise to future generations.

Every year on 5th June, World Environment Day brings together communities, organisations, and nations to raise awareness about environmental challenges and foster sustainable action. The 2025 theme, **"Beat Plastic Pollution"** draws attention to one of the most urgent ecological threats of our time and urges unified efforts to combat it.

At IndianOil, we are proud to be part of this global movement. Whether it is discouraging the use of single-use plastics, utilising discarded bottles in road construction, or promoting the Unbottled initiative, our actions reflect our firm commitment to environmental stewardship. Our responsibility, however,

extends far beyond business boundaries. Through impactful CSR and sustainability initiatives, we continue to shape a greener tomorrow — be it through the reintroduction of Cheetahs into Indian wildlife, adoption of the one-horned Rhino and Olive Ridley Turtles, or the creation of green lungs through Miyawaki plantations across our locations. Each of these efforts demonstrates our deep-rooted belief in preserving biodiversity and nurturing nature.

At the core of our every success story is you : the IndianOil family. On this World Environment Day, I appeal each IOCian to contribute in their own meaningful way, it can be in the form of - reducing waste, reusing plastics, conserving water, or embracing mindful consumption in daily life. Every small action matter, and when multiplied across our vast IndianOil network, it can bring about transformative change.

"प्रकृतिं रक्षन्तु सर्वे, जनजीवनं सुखी भवतु" — Let all protect nature, so that all lives may be happy.

As an organisation that fuels the Nation, let us also fuel the hope for a cleaner, greener, and more compassionate Earth.

Rashmi Govil
Director (HR)
